MODEL 600 Patrolmaster Radar

The 600 Patrolmaster is the most advanced design and highest quality traffic radar ever offered to law enforcement agencies. Its narrow, pencil-like beam can pick out any one lane in multi-lane street or highway traffic . . . AND AT SUCH LONG RANGE THAT THE OFFICER READING THE METER HAS PLENTY OF TIME TO STOP THE OFFENDER without the need of a separate chase car.

Astrotherm Corporation also manufactures the Model 400 Trafficmaster radar . . . a new, improved, low cost unit that brings radar speed control within the reach of the smallest towns and villages.

Better uniforms for policewomen?

Delta makes them—
but naturally
you pay a little more!

Many police chiefs have found it's good economy to provide policewomen with Delta uniforms—even though they cost a bit more to begin with!

That's because Delta uniforms:

- 1 are sewn by tailors to women
- 2 are cut from exclusive women's patterns, so they fit better, and hold their shape
- 3 last longer than ordinary uniforms!
- 4 are made of better-quality cloth.

Their better fit works wonders for morale, too. Send for your copy of our style illustrations today!
